Welcome to the International Masonry Institute's Tool Kit section on Safety Toolbox Talks.

Here you will find several important safety subjects that you and/or your foreman can use on relevant jobsites. These pieces are meant to stimulate conversation between the foreman and craftworkers regarding various aspects of the job. The user should take a moment to review the piece prior to presenting, taking into consideration any personal examples that can be shared to further the point, or questions to ask that would draw the attendees into discussion. If appropriate, use props such as the tool or piece of equipment being discussed. And, last but not least, give employees some take away actions. Attached is an attendance sheet for your use.

If you have any further topics to suggest or any questions about these Tool Kit Pieces or to provide feedback on their effectiveness – please contact **Mike Kassman** at mkassman@imiweb.org.
