Availability

Workforce development is a make-or-break issue in construction. The BAC/IMI network of skilled craftworkers and training experts helps ensure a ready supply. Another network advantage is craftworker mobility, which allows IMI to tap into other areas for craftworkers to meet the needs of your job.

Specialized Training

Design and build with confidence, no matter how unique the project requirements. IMI training and technical experts work with you to design specific training programs that meet job-site demands and ensure quality installation.

Qualified Contractors

IMI is the link between the project team and the qualified masonry contractor. We help identify the right bidders and even prepare them for specialized project requirements.
